---

Front-End Developer** with **10+ years in software development**, specializing in **React**, **TypeScript** and **Svelte**, with* full-stack experience *in **Node.js**. Proven track record building healthcare and e-commerce products at scale — from migrating legacy frontends to achieving 100% test coverage in production apps. **Strong frontend focus** backed by a **QA background** that translates into **high-quality**, **well-tested code

TECHNICAL SKILLS

Frontend: **JavaScript**, **HTML5, CSS3, React**, **TypeScript, Svelte**, **Redux**, **Tailwind**, **React Native**, **GraphQL, Component Libraries / Design Systems**
Backend: **Node.js**, **Next.js**, **Express, REST**
Databases: **MongoDB**, **PostgreSQL**
Testing: **Jest**, **Vitest**, **E2E**
Dev Tools: **Git**, **Docker**, **CI/CD**, **Agile/Scrum**

PROFESSIONAL EXPERIENCE

KOPIUS - *(US consultancy)* *Dec 2022 - Present*
Frontend Developer

- Built and maintained **React/Svelte** healthcare web apps with **100% test coverage** using **Jest/Vitest**, eliminating entire categories of production bugs
- Developed a **Next.js** application acting as a data integration layer between external financial market data services (stocks, real-time pricing) and internal systems, improving reliability and reducing service failures
- Acted as Technical Leader, owning architectural decisions and coordinating frontend development across the team
- Led a full refactor of a patient/practitioner scheduling system using **React**, **Redux**, **Tailwind** and **GraphQL**, building reusable components and improving maintainability and performance

SOLVD - *(IT nearshore services company)* *Oct 2021 - Dec 2022*
Frontend Developer

- Redesigned and simplified a multi-step user onboarding flow using **React**, **Redux** and **Tailwind** for a B2C SaaS product, directly increasing registration conversion rate by 13%
- Integrated **GraphQL** APIs on the frontend using **Apollo Client** to handle efficient data fetching and avoid over-fetching

ENDAVA - *(Global tech services, NYSE: DAVA)* *Feb 2020 - Oct 2021*
Full-Stack Developer

- Built a full-stack internal HR application end to end, developing the **React**/**Redux** frontend and a **Node.js**/**Express** backend with **MongoDB** and **PostgreSQL**
- Developed and maintained a client-facing **React Native** app, ensuring full compliance with **WCAG 2.0 accessibility standards**

MERCADOLIBRE - *(Latin America's leading e-commerce & fintech platform)* *Aug 2017 - Feb 2020*
Productivity Engineer

- Worked in **AWS-based environments**, using S3, EC2, Route 53 and Elastic Load Balancing (ELB) to support deployment and infrastructure for frontend tooling and applications
- Kicked off the migration of Fury — MercadoLibre's largest internal frontend, a **micro-frontend architecture** where independently-deployed apps coexisted — from Angular 1 to React (16.8/17), adopting the then-new hooks API and modern function components
- Built internal DevEx tooling to speed up frontend teams: **NPM boilerplate packages** and a **CLI** to scaffold **WebDriverIO** setups in a single command
- Developed a dashboard that surfaced per-PR test coverage, reading CI-generated reports by commit hash and displaying an expandable per-file breakdown
- Introduced and evangelized end-to-end testing across frontend teams (**Nightwatch**, later **WebDriverIO**), delivering hands-on talks at multiple MercadoLibre offices
- Operated and maintained **CI/CD** pipelines in **Jenkins** — debugging build failures via log analysis, enforcing a 90% coverage threshold on GitHub checks, and running a rotating on-call to keep teams unblocked

INTIVE *Mar 2016 - Aug 2017*
QA Automation Engineer

- Built intive's test automation solution from the ground up as the company's first automation engineer, using C#, Selenium and the Page Object Model
- Was the first engineer assigned to Intelligize — which grew into intive's largest project — running automated feature testing and manual regression testing for production releases

ACCENTURE *Sep 2014 - Mar 2016*
Backend Developer

- Developed an internal C# application to help managers track expenses and cash flow
- Led a proof of concept to migrate the team's UI automation from CodedUI to Selenium

EDUCATION & CERTIFICATIONS

Technical Degree in Programming *Avellaneda, Buenos Aires*
Universidad Tecnológica Nacional *2009 - 2011*
